Contents Volume 156

1 Editorial: Finalist papers of the EURO award 2001 for excellence in practice
B. Fleischmann

2 Supply chain optimization in the pulp mill industry—IP models, column generation and novel constraint branches
D. Bredström, J.T. Lundgren, M. Rönnqvist, D. Carlsson and A. Mason

23 Total cost of ownership purchasing of a service: The case of airline selection at Alcatel Bell
Z. Degraeve, E. Labro and F. Roodhooft

41 Operational planning of a large-scale multi-modal transportation system
B. Jansen, P.C.J. Swinkels, G.J.A. Teeuwen, B. van Antwerpen de Fluiter and H.A. Fleuren

54 Three approximation algorithms for solving the generalized segregated storage problem
D. Barbucha

73 Design of a degree-constrained minimal spanning tree with unreliable links and node outage costs
R. Kawatra and D. Bricker

83 Mixed integer programming for the 0–1 maximum probability model
A. Billionnet

92 Causal modeling alternatives in operations research: Overview and application
R.D. Anderson and G. Vastag

110 Product warranty logistics: Issues and challenges
D.N.P. Murthy, O. Solem and T. Roren

127 Inventory games
A. Meca, J. Timmer, I. García-Jurado and P. Borm

140 Analysis of the effect of various unit costs on the optimal incoming quantity in a perishable inventory model
C.L. Williams and B. Eddy Patuwo

148 Coordinating order quantities between the manufacturer and the buyer: A generalized newsvendor model
Z.K. Weng

162 The multiscenario lot size problem with concave costs
J. Gutiérrez, J. Puerto and J. Sicilia

183 Dynamic programming for delayed product differentiation
H.-M. Hsu and W.-P. Wang

194 A supply chain network equilibrium model with random demands
J. Dong, D. Zhang and A. Nagurney

213 More on complementarity and substitutability in the transshipment problem
C.E. Weber

223 Multicriteria methodology for the evaluation of a Greek engineering department
Y. Politis and Y. Siskos

doi:10.1016/S0377-2217(03)00863-4

241 Improving competitiveness in veneers production by a simple-to-use DSS
A. Čižman and J. Černetič
261 Parallel machine scheduling of machine-dependent jobs with unit-length
Y. Lin and W. Li

267 Designing a performance measurement system: A case study
C. Lohman, L. Fortuin and M. Wouters
287 Expected time in system analysis of a single-machine multi-item processing center
R. Kuik and P.F.J. Tielemans
305 An optimal polynomial time algorithm for the common cycle economic lot and delivery scheduling problem
M.T. Jensen and M. Khouja
312 Analyzing variability in continuous processes
K. Rajaram and A. Robotis
326 Multi-objective design of team oriented assembly systems
J. Bukchin and M. Masin
353 N-period contracts with ordering constraints and total minimum commitments: Optimal and heuristic solutions
R.S. Tibben-Lembke
375 An analysis of queueing systems with multi-task servers
Z.G. Zhang and N. Tian
390 Permuted derivative and importance-sampling estimators for regenerative simulations
J.M. Calvin and M.K. Nakayama
415 The dimension for the European Union Council under the Nice rules
J. Freixas
420 Hierarchies with dependence of technological alternatives: A cross-impact hierarchy process
K.-T. Cho and C.-S. Kwon
433 Dynamic multiple responses by ideal solution analysis
L.-I. Tong, C.-H. Wang, C.-C. Chen and C.-T. Chen
445 Compromise solution by MCDM methods: A comparative analysis of VIKOR and TOPSIS
S. Opricovic and G.-H. Tzeng
456 An experimental introduction of group process support in social services
M. Read, T. Gear and R. Devold
467 Valued outranking relations in ELECTRE providing manageable disaggregation procedures
V. Mousseau and L. Dias
483 Evaluating feature selection methods for learning in data mining applications
S. Piramuthu
495 Fuzzy classification systems
A. Amo, J. Montero, G. Biging and V. Cutello
508 Bayesian network classifiers for identifying the slope of the customer lifecycle of long-life customers
B. Baesens, G. Verstraeten, D. Van den Poel, M. Egmont-Petersen, P. Van Kenhove and J. Vanthienen
524 Concurrent flowshop scheduling to minimize makespan
C. Koulamas and G.J. Kyparisis
530 A note on the subjective and objective integrated approach to determine attribute weights
X. Xu

533 Operational research models and the management of fisheries and aquaculture: A review
T. Bjorndal, D.E. Lane and A. Weintraub
541 Bicriteria network location (BNL) problems with criteria dependent lengths and minisum objectives
A.J.V. Skriver, K.A. Andersen and K. Holmberg
550 The construction of stable project baseline schedules
W. Herroelen and R. Leus
566 An extreme point algorithm for a local minimum solution to the quadratic assignment problem
C.A. Fedjki and S.O. Duffuaa
579 A cutting plane algorithm for computing k-edge survivability of a network
Y.-S. Myung and H.-j. Kim
590 A mathematical model and a solution method for the problem of placing various-sized circles into a strip
Yu.G. Stoyan and G. Yas'kov
601 A population heuristic for constrained two-dimensional non-guillotine cutting
J.E. Beasley
628 A service quality and success model for the information service industry
H. Landrum and V.R. Prybutok
643 A decomposition approach for an equipment selection and multiple product routing problem incorporating environmental factors
D.P. Bennett and C.A. Yano
665 Determining firm-level IT investments to facilitate value chain activities: Should spillovers accruing to value chain members be incorporated?
J. Mahajan and A.J. Vakharia
683 Development of a measure to assess quality management in certified firms
F.J. Conca, J. Llopis and J.J. Tari
698 U-shaped assembly line layouts and their impact on labor productivity: An experimental study
G.R. Aase, J.R. Olson and M.J. Schniederjans
712 Analysis of a production/inventory system with randomly failing production unit submitted to regular preventive maintenance
A. Chelbi and D. Ait-Kadi
719 Commercial branch performance evaluation and results communication in a Canadian bank—a DEA application
J.C. Paradi and C. Schaffnit
736 An improved algorithm to determine lower bounds for the fixed spectrum frequency assignment problem
R. Montemanni, D.H. Smith and S.M. Allen
752 A crane scheduling method for port container terminals
K.H. Kim and Y.-M. Park
769 Human resources management at a marine container terminal
P. Legato and M.F. Monaco
782 A state-transition simulation model for the spread of Salmonella in the pork supply chain
M.A. van der Gaag, F. Vos, H.W. Saatkamp, M. van Boven, P. van Beek and R.B.M. Huirne
799 Contents Volume 156
